25X1

Dear Sir:

Referring to our letter of January 16, quoting a total of \$68,643.00 for a special Noiseless, (Multi-Magazine Camera) you are advised that we will include an automatic aperture control of one lens of the short focal length lenses which you may select. In a further discussion of this matter, [redacted] informs me that this was his understanding of an agreement discussed with you last year.

25X1

During the design and development of this Camera, we will make a study of the possibilities of solving the problem of aperture controls for the complete line of ^{Eica} Leica lenses which you consider necessary for this Camera.

Attached hereto is our proposal for the Cine Kodak 40 mm, K-100 aperture control and the proposal for the 900 mm Zeiss APO Tessar aperture control.

Per your request, we are also forwarding attached our proposal for the design and construction of the special thin, noiseless, remote controlled 35 mm Camera.

We trust that this letter with the attached proposals will eliminate any further misunderstanding in regard to past and present camera equipment proposals.

Very truly yours,

25X1
